## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3, 9-11 rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S Patent No.5873856 to Hijertman et al.

Hijertman discloses a protected needle assembly. This apparatus contains a housing 21, a container for product 10, where the container is accommodated by housing, an injection needle 11 connected to container and protruding beyond the housing, a needle protection sleeve 31, and an indicator 33, which indicates to a user that a needle protection sleeve is in its distal position. The housing comprises an inner sleeve 20 and an outer sleeve 31, between which an annular gap 50. The needle protection sleeve 31 is received with a receiving sleeve 20 coupled with the housing and disposed concentrically around the needle protection sleeve so that movement of the needle protection sleeve within the receiving sleeve.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3763

2. Claims 4-8 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,873,856 to Hjertman et al as applied to claim 1 above, and further in view of U.S. Patent No. 6,287,283 to Ljunggreen et al

Hjertman indicator is a manual apparatus for the movement of the needle and the indicator positioning of the needle. It would be obvious to modify the manual apparatus and utilize electronic means of defining the position of the needle, because most of the syringes have modified to become digital. One example is Ljunggreen, which discloses an apparatus for the registration of the setting of a medical device. Ljunggreen utilized a digital electronic display as is common and in practice.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to switch from manual to electronic, because as stated by Ljunggreen digital on the electronic display are more legible in relation to small indicators on the adjustment sleeve. Also, misalignment of this scale in relation to the rim of the outer sleeve might occur. This is obviated according to the invention by the great digits on the display. (Col.4, lines 36-42)

### ***Response to Arguments***

3. Applicant's arguments filed 10-22-02 have been fully considered but they are not persuasive.

Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3763

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
